IDENTIFIERS	*State University of New York

ABSTRACT

The report on utilization of residence hall facilities consists of detailed data collected in the sixteenth annual survey which was conducted during the fall of 1989. The study includes all State-operated institutions which have residence hall facilities. A listing of these institutions, organized by institutional type, is provided but does not include residence hall facilities available at locally sponsored Community Colleges. Trend data are displayed for each institution, including fall 1989 utilization by institution within institution type, and graphic displays of percent utilization of residence hall facilities. A decrease in actual total utilization and percent utilization from the previous two years is reported. Contains 12 tables of data, 25 graphic charts, and a publications list. (GLR)

PREFACE

This report on Utilization of Residence Hall Facilities consists of detailed data collected for the sixteenth annual survey which was conducted during the Fall of 1989. The report also contains summary data for Fall 1980 through Fall 1989. Detailed tables for Fall 1974 through Fall 1988 inclusive, are available in earlier reports published by this office (see Publications List, page 52). Details regarding the residence hall program are important in the planning and budgetary functions of each institution. While the survey was specifically designed to meet the data requirements of the State University Central Administration Offices of Institutional Research and Planning, Finance and Business, and Student Affairs and Special Programs, requests for these data have subsequently come from many sectors both inside and outside of the State University.

The study includes all State-operated institutions which have residence hall facilities. A listing of these institutions, organized by institution type, can be found on page vi; reference to institution type in this publication, therefore, includes only those institutions listed. Residence hall facilities available at locally sponsored Community Colleges under the program of the State University of New York are financed in a different manner and are not included in the study.

Graphic displays of percent utilization of residence hall facilities are again included in this publication. Trend data are displayed for each institution, as well as Fall 1989 utilization by institution within institution type.

A study of this complexity could not have been completed without the full cooperation of the institutional respondents and other Central Staff Offices. We also thank our secretarial staff, Mrs. Claudia Fleming, and Mrs. Vikki Mazzone, who prepared the final transcript and distributed all copies of the publication.

INTRODUCTION

The methodology and definitions used in this study have been developed to be consistent with the State University of New York Policies and Procedures Manual. Definitions of the basic concepts used in this report are provided beginning on page xi.

A general policy change occurred in University management of residence halls between 1985 and 1986. One manifestation of the change is the restructuring of dormitory fiscal operations into a Dormitory Income Fund Reimbursable (DIFR) structure. Accompanying this new structure is a series of alterations in rate setting and revenue generation:

1. The concept of a single University-wide standard double room rate has been replaced by the acceptance of institution-specific standard double room rates, which must fall within a specified range of the average of standard double room rates for all of the State-operated institutions of the State University of New York.

2. The ratio of superior and reduced rates to the standard double rate is now at the discretion of each institution, pending approval from Central Administration.

3. The algorithm to calculate the number of allowable Resident Assistant waivers has been greatly simplified. The RA factor concept has been discontinued, and an acceptable range of RA waivers from 4% to 6% of resident student occupancy (headcount) is now in effect.

4. It is now permissible to place lodgings into an inactive status under certain conditions.

For information about the policy, refer to the Dormitory Income Fund Reimbursable (DIFR) Guidelines published in November 1987 by the State University of New York Office of Finance and Business.

Three tables have been designed to provide supporting information to evaluate the effect of these policy initiatives on the utilization of residence halls. Table 5, Utilization of Net Revenue Producing Adjusted Design Capacity by Rate, shows the schedule of rates developed by each institution as of Fall 1989, as well as the occupancy of facilities at each rate. Tables 6 and 7, which deal with Resident Assistant Bed Rental Waivers, show the accepted range of bed rental waivers. Increased variability in amount of Resident Assistant Waivers (i.e. .66, .4, .74) has resulted in the necessity to report the more unusual waivers in terms of ranges rather than by actual waiver portion.

The report contains seven tables of data for Fall 1989:

Table 1 presents aggregated data which describes the original capacity of the residence hall facilities, the permanent and temporary adjustments to this original capacity, net available space and percent of actual utilization.

Table 2 provides more detailed data concerning the types of utilization of net available space depicted in Table 1. Resident student utilization as well as other types of utilization are arrayed in categories, as described in the column headings.

Table 3 focuses on resident student utilization summarized on Table 2. Data are arrayed by institution, type of accommodation and rate paid by the students.

Table 4 describes revenue-producing utilization of residence halls for other than student occupancy. Net utilization of each campus is arrayed with "other uses" data to clarify the relationship between amount of space available and "other" revenue-generating effort. "Other uses" data are arrayed within each category by bedcount, headcount, and percent of revenue generated.

Table 5 arrays the utilization of net revenue producing adjusted design capacity by rate. For each institution, revenue-producing utilization is shown in total, then detailed--along with the associated rates charged in Fall 1989--by utilization of non-married enrolled students; that of students accommodated as married; and other revenue-producing utilization. Also, the bedcount of unoccupied facilities is shown for non-married enrolled students and married students.

Table 6 displays, by institution, the distribution of Resident Assistant Bed Rental Waivers, total student occupancy, and the ratios of resident students to resident assistants. Because of an increase in unusual RA/Student ratios, they are now grouped into the following units/ranges: 2 to 1; 1 to 1 (the two most common ratios); .75 to .99; .60 to .74; and .59 or less.

Table 7 augments Table 6 and displays total resident student occupancy, the authorized range of bed rental waivers--from 4% to 6% of the total resident student occupancy--and the actual bed rental waivers used, in terms of bedcount and headcount (number of RA's). Finally, the resident student-to-resident assistant ratio is shown for each institution and as an overall ratio.

Tables 8 through 12 depict trends concerning utilization of residence hall facilities from Fall 1980 through Fall 1989:

Table 8, total utilization (headcount); Table 9, percent utilization; Table 10, non-revenue assignments; Table 11, revenue producing utilization for purposes other than resident student occupancy (bedcount); and Table 12, the ratio of students to resident assistants. The definitions over the ten year period are consistent with those described beginning on page xi.

SUMMARY OF DATA

In the Fall of 1989, the total current utilization of residence hall facilities (headcount) was reported to be 62,039. This level of occupancy represents a decrease in actual total utilization (headcount) from the previous two years (see below and tables 1 and 8). The percent utilization (99.0) is also the lowest since the Fall of 1986. The net revenue producing adjusted design capacity has also decreased to 62,668 (bedcount). This is largely a result of de-activating some facilities which were active last year.

Summary of Utilization of Original Design Capacity of Residence Hall Facilities State-Operated Institutions, State University of New York Fall 1980 Through Fall 1989

Year	Original design capacity (bedcount)	Net revenue producing adjusted design capacity (bedcount)	Total utilization (headcount)	Percent utilization of net revenue producing adjusted design capacity
Fall 1980	66,569	61,192	66,003	106.6
Fall 1981	67,569	62,290	65,210	104.7
Fall 1982	67,965	62,484	65,132	104.2
Fall 1983	68,027	62,574	62,662	100.1
Fall 1984	68,431	62,746	61,554	98.1
Fall 1985	68,432	62,737	61,701	98.3
Fall 1986	68,432	62,488	61,506	98.4
Fall 1987	68,427	62,313	62,703	100.6
Fall 1988	68,837	63,141	63,957	101.3
Fall 1989	68,837	62,668	62,039	99.0

Resident student utilization was 98.9% of the total Fall 1989 headcount utilization.

Revenue producing utilization of residence halls for purposes other than resident student occupancy has decreased from last year to 750. This bedcount is the lowest since Fall 1986. The trend data indicate that for eight of the last ten years revenue producing utilization of residence halls for purposes other than resident student occupancy had steadily increased, with only two years, Fall 1986 and Fall 1989, showing a decrease from the previous year (see Table 11).

While there were some increases and decreases in the number of students per resident assistant for individual institutions, the average number of students per resident assistant for each sector and for the system as a whole has remained relatively constant for the past ten years (see Tables 7 and 12).

The percent utilization of net revenue producing adjusted design capacity was reported as 99.0 percent in the Fall of 1989. This percent utilization represents the lowest level since Fall 1986, and the first year since Fall 1986 that there was a level lower than 100 percent. The data for Fall 1989 indicate that, thirteen of the twenty-five institutions (last year there were fourteen) reported utilization of 100 percent or greater while five other institutions reported utilization ranging from 95.0 percent to 100 percent.

Utilization at each of the four University Centers has declined to the lowest level in the last ten years, with exception of the Fall 1983 utilization for the University at Buffalo. Since reaching the highest utilization point in six years last year, the Fall 1989 data reveal that the percent utilization of net revenue producing adjusted design capacity for the University Colleges has decreased, and is now below the 100 percent level.

Conversely, Fall 1989 data reveal that the percent utilization at the six Colleges of Technology/Agriculture remains consistently high (112.3), and even higher than the level in Fall 1988 (109.6). Utilization at the Colleges of Technology/Agriculture has increased to its highest level since the Fall of 1983 (see Tables 1 and 9).

Of the 25 institutions surveyed, facilities at 12 were under-utilized (showed a negative net utilization). Eight of these twelve, and one institution whose facilities were over-utilized, were able to generate revenue through utilization other than student occupancy. Based on projected revenues assigned to the Dormitory IFR this year, one institution (Brockport), reported an estimated revenue generation of 0.0% for their "other utilization" facility. Percent of revenue generated for all "other utilizations", including the facility at Brockport, averaged 34.8% of the total possible student revenue generation, with a high of 100% and a low of 0.0% (see Table 4).

DEFINITIONS

Residential Capacity Descriptors

BEDCOUNT--a unit of measure used to describe the capacity of the facility for residential purposes.

ORIGINAL DESIGN CAPACITY--the original residential capacity of the facility (expressed as BEDCOUNT*) as determined by architectural plans.

PERMANENT ADJUSTMENTS TO ORIGINAL DESIGN CAPACITY--permanent conversions of on-campus facilities which increase or decrease their residential capacity (expressed as BEDCOUNT).

NON-REVENUE ASSIGNMENTS--residential capacity (expressed as BEDCOUNT) exempted from revenue production for special uses such as for RESIDENT ASSISTANTS. These assignments are subject to annual review by Central Administration.

NET REVENUE PRODUCING ADJUSTED DESIGN CAPACITY--the capacity of the facility (expressed as BEDCOUNT) available for revenue producing uses. (ORIGINAL DESIGN CAPACITY, less NON-REVENUE ASSIGNMENTS, plus ADDITIONS TO ORIGINAL DESIGN.)

"SINGLE", "DOUBLE", "TRIPLE", ETC.--refers to the DESIGN CAPACITY of the facility, NOT its level of occupancy. For example, a "TRIPLE" is NOT a crowded double, but a facility DESIGNED for three occupants.

Actual Occupancy/Use Descriptors

HEADCOUNT--a measure of use which is the number of students or other persons occupying the facilities usually for residential purposes. Non-residential use of a facility, (e.g. office space) measured in terms of HEADCOUNT, is the number of students displaced by the use of the facility for other purposes.

RESIDENT STUDENT OCCUPANCY--the HEADCOUNT of enrolled students and their spouses who reside in residence hall facilities. (This excludes RESIDENT ASSISTANTS.)

RESIDENT ASSISTANTS--students assigned to and residing in residence hall facilities for the purpose of peer counseling and the betterment of the quality of life within the residence hall complex. The BEDCOUNT of facilities dedicated for RESIDENT ASSISTANT occupancy is exempted wholly or in part from revenue production.

DEFINITIONS
(Continued)

OTHER USES--uses of residence hall facilities for non-residential purposes such as office space or classrooms, or for residential use by students from other colleges or special non-student residential occupancy.

LEVEL OF OCCUPANCY--that is, SUPERIOR occupancy is a room occupied at the election of the student(s) by fewer people than its design capacity; STANDARD describes occupancy at the exact level of a unit's design capacity; and REDUCED occupancy refers to a room occupied by more people, not at the election of the student(s), than its design capacity.

Utilization Indices

PERCENT OF REVENUE GENERATED -- for revenue-producing other uses...the estimated percent of revenue which this use will yield compared to what it would yield for regular student use at the standard rate.

CURRENT UTILIZATION--the total actual utilization (expressed as HEADCOUNT*) of an occupied facility's available revenue producing capacity. This is the sum of total RESIDENT STUDENT OCCUPANCY and total OTHER USES.

NET UTILIZATION--the CURRENT UTILIZATION less NET REVENUE PRODUCING ADJUSTED DESIGN CAPACITY. This figure is negative (-) if the facility is under-utilized and positive (+) if the facility is over-utilized.

TABLE 2

Footnotes

[a]Excludes Empire State College, College of Environmental Science and Forestry, College of Optometry, College of Technology at Utica/Rome, and the Statutory Colleges.

[b]Headcount is the same as net revenue producing adjusted design capacity because there are not under- or-over-utilization measures for these cases. The number of adjusted design capacity beds used for such purposes as Guest Rooms, Conference Centers, Administrative Office Space, Classrooms, Educational Programs, State Agencies, etc., is the same as the total possible number of persons (students) who are displaced by these "Other Utilization" arrangements.

[c]The Health Sciences Center component is an intrinsic part of the data for these institutions.

TABLE 3

Footnotes

[a]Excludes Empire State College, College of Environmental Science and Forestry, College of Optometry, College of Technology at Utica/Rome, and the Statutory Colleges.

[b]If headcount exceeds bedcount, the accommodation is over-utilized or "crowded". If bedcount exceeds headcount, the accommodation is under-utilized.

[c]Bedcount of completely unoccupied rooms, suites, or apartments.

[d]Includes rooms, suites, and apartments.

[e]Other types of accommodations, including, but not limited to, space used as sleeping quarters not originally designed for that purpose, such as lounges and study areas where the adjusted design capacity bedcount is zero; and septuples and octuples with the appropriate adjusted design capacity bedcount.

[f]Consist of smaller rooms which, together, were designed as suites or apartments to accommodate six students.

[g]The Health Sciences Center component is an intrinsic part of the data for these institutions.

[h]Consist of large room(s) designed to house six students.

[i]Consist of two bedroom apartments which were designed to accommodate four students.

[j]Consist of three bedroom apartments which were designed to accommodate six students.

[k]Consist of one bedroom apartments which were originally designed as one bedroom apartments and are not the same type of design capacity as a single or double.

TABLE 4

Footnotes

[a]See the DEFINITIONS section for a description of "percent of revenue generated".

[b]Excludes Empire State College, College of Environmental Science and Forestry, College of Optometry, College of Technology at Utica/Rome, and the Statutory Colleges.

[c]Net Utilization is derived in Table 1, and is displayed here to facilitate comparison between underutilization and amount of revenue-generating "other" utilization.

[d]Total and subtotal percent columns are weighted averages.

[e]Due to the Fall 1989 estimation of revenue generated for the Thompson Conference Center at Brockport (0.0%), this percent of revenue generated is substantially lower than it has been in previous years.

[f]The Health Sciences Center component is an intrinsic part of the data for these institutions.

[g]While there are 201 beds assigned to the Thompson Conference Center, the semester occupation varies substantially, and based on Fall 1989 estimations, there will not be any revenues assigned to the Dormitory IFR for that occupancy this year.

-18-

Footnotes

[a]Unless otherwise indicated, rate shown is per occupant, not per dwelling, for one semester time period. Rates are those current as of Fall 1989.

[b]Excludes Empire State College, College of Environmental Science and Forestry, College of Optometry, College of Technology at Utica/Rome, and the Statutory Colleges.

[c]Special rate for superior housing.

[d]This "other revenue" use represents an estimated revenue generation of 100% of the total possible standard revenue at this semester rate.

[e]A single person room rate assigned to converted study or lounge space.

[f]Married students are billed for the entire apartment (13 apartments total) at a semester rate of $2,595.00 regardless of the number of individuals occupying an apartment.

[g]This semester rate applies to a reduced double, reduced triple, or converted lounge or study area.

[h]The Health Sciences Center component is an intrinsic part of the data for these institutions.

[i]These figures represent the rate per person per month.

[j]Married students are billed in this case for entire apartments at a semester rate of $1,060.00 regardless of the number of individuals occupying the apartments.

Footnotes (continued)

[k]This "other revenue" rate represents a potential semester rate of $960.00 per person, generated from student occupancy of the Thompson Conference Center. However, there are currently no revenues that are anticipated to be assigned to the Dormitory IFR for that occupancy. Thus, the projected revenue generation is 0.0% of the total possible standard revenue at the $960.00 rate.

[l]A single person is occupying a designed double room at this semester rate.

[m]This "other revenue" use represents an estimated annual revenue generation of 6% of the total possible standard revenue at the $950.00 rate during the academic year. The 6% is based on annualized revenue projections of approximately $18,000 for this alternate use facility as compared to the total possible student revenue of approximately $300,000 generated during an academic year.

[n]This figure represents a rate per semester per apartment, and assumes an occupancy of 4 people per apartment.

[o]This "other revenue" use represents a revenue generation of approximately 38% of a $925.00 semester rate.

[p]This "other revenue" use represents a revenue generation of 50% of a $2,240.00 semester rate.

[q]The married students occupying apartments are billed monthly at this rate.

[r]These figures were equated to a semester basis. The Fall rates (shown here) are less than the Spring rates because charges are actually on a monthly basis. There are fewer months (4 mo.payable) in the Fall semester.

[s]This "other revenue" use represents an estimated annual revenue generation of 71% of the total possible standard revenue at the $990.00 rate per semester.

Footnotes

[a]Excludes Empire State College, College of Environmental Science and Forestry, College of Optometry, College of Technology at Utica/Rome, and the Statutory Colleges.

[b]The students shown here as Resident Assistants have received whole or partial bed rental waivers as indicated by the distribution of such waivers. These Resident Assistants perform a range of assignments which vary in type and degree of commitment. Therefore, the ratios shown here do not necessarily reflect differences in Resident Assistant services available to students.

[c]The Health Sciences Center component is an intrinsic part of the data for these institutions.

[d]The actual portion of bed rental waived is 1.75.

TABLE 7

Footnotes

[a]Excludes Empire State College, College of Environmental Science and Forestry, College of Optometry, College of Technology at Utica/Rome, and the Statutory Colleges.

[b]The setting of guidelines for authorized bed rental waivers has been changed by the Central Staff Office of Student Services to a concept of an authorized range rather than an algorithm based on an RA factor. The range extends from 4% (low) to 6% (high) of the resident student occupancy (headcount). The resulting figures in these columns are thus measures of headcount.

[c]The students shown here as Resident Assistants have received whole or partial bed rental waivers as indicated by distribution of such waivers. These Resident Assistants perform a range of assignments which vary in type and degree of commitment. Therefore, the ratios shown here do not necessarily reflect differences in Resident Assistant services available to students.
